ELCAM MEDICAL ACQUIRES MAJORITY INTEREST IN INJECTECH

Elcam Medical is pleased to announce that it has acquired a majority interest in Injetech, LLC, a privately-held company based in Loveland, Colorado. Injetech is a leading OEM provider of luer connectors, barbed fittings, check valves and custom injection molded components to the healthcare industry. Injetech has built a reputation as a flexible, high quality supplier that assists customers on all levels of project management - from prototype to production runs.

Injetech was founded in 1999 and over the past several years they have grown their business by focusing on customer responsiveness with high quality products and superior service. Injetech specializes in plastic product design, tool development, injection molding and assembly services. Injetech's flexibility and ingenuity has allowed the company to explore numerous resins and part designs. With Injetech, you are only one phone call away from an owner.

According to Ehud Raivitz, Elcam Medical CEO, "We see great synergy between the two companies and their products. We are impressed with Injetech's reputation among their customer base, especially their quality and responsiveness. Injetech also provides Elcam with a U.S. based manufacturing operation".

Injetech will operate as an independent entity. Dave Splett and Larry Knipple will continue to manage the operations of Injetech. Lloyd Fishman, Elcam

Medical, Inc. Vice President, Business Development & Marketing will serve as Chairman of the Board.

Historically Elcam has achieved consistent growth through its leadership position in its core businesses. In addition to its investment in Injetech, Elcam will continue to seek other opportunities for non-organic growth either in product lines, technologies and synergistic companies.

Elcam Medical is the leading worldwide OEM supplier of Fluid Management, Drug Delivery and Vital Signs Monitoring systems and devices. In providing "Ideas to Solutions", Elcam is an innovative, customer-centric, full-service partner with capabilities ranging from design through manufacturing with particular expertise in high volume precision molding, high speed assembly and laser applications.
