

June 1, 2021

Dear Valued Elcam Medical Customer,

We hope you and your loved ones are safe and healthy.

Elcam is happy to report that as of June 1 almost all COVID restrictions in Israel have been removed and consequently the work in our Israeli facilities has returned to normal. We are currently preparing to reinstate face-to-face business meetings according to the restrictions in destinations regions. We are hoping this is the start of an end to the Corona crisis and we hope for similar news in the rest of the world soon.

Our Italian facilities and US offices are still working according to local restrictions while reporting a positive progress:

Elcam's Italian facilities are progressively returning to PRECOVID operation conditions and we plan to complete the transition by end of June.

Please start to plan your business trips and return to face to face business meetings and visits to our plants in Italy in Q3.

Our US offices are still working remotely but in full capacity as before since the beginning of the pandemic. There is no anticipated delay in their operations.

#### Transportation news

Due to the continuing Corona crisis and its different implications we are still aware of growing delays in international transportation especially concerning freights.

Due to these delays and in an effort to avoid future supply problems, we would like to recommend that you precede your orders and enlarge your inventory for the upcoming three months.

#### Raw materials

Elcam is also aware of concerns regarding raw materials shortages and would like to inform you that it is Elcam's policy to keep 3 months of inventory for all our raw materials. We are in ongoing and continuous contact with all our raw material suppliers and do not anticipate any problems in this direction.

Furthermore, Elcam also keeps a 3 months stock of most of its products.

We will continue monitoring the situation and will immediately update you as new information becomes available.

Best Regards,

**Amir Bohadana**

Chief Sales Officer
