

September 17, 2020

Dear Valued Elcam Medical Customer,

We hope you and your loved ones are safe and healthy in these times of Corona pandemic.

Following is the latest update on Elcam's ongoing actions in respect of the COVID-19 situation.

As of September 18th due to new spikes in confirmed cases, Israel is entering a second lockdown and we at Elcam are preparing accordingly.

We have consulted with our freight companies and manufacturing facilities and currently we do not foresee any disruption to our operation.

Elcam continues to operate at full capacity and in compliance with the instructions of the health authorities in the countries of operations.

Following are main actions we take as a part of Elcam continuity actions:

- All Elcam facilities have been recognized by the local authorities as an essential facility to enable the continuity of our production. (See statement by the Israeli Ministry of Economy and Industry).
- Production staff are divided to teams with no contact between them.
- A large portion of Israeli, US and European employees who are not required at the facilities are working from home.
- Italian employees are working from office keeping with all the necessary restriction.
- The number of employees allowed to be present at any certain time is limited according to social distancing requirements.
- Meetings are done on video.
- Access to our facilities is limited to essential needs only such as logistics.
- Majority of orders continue to be shipped by sea. Air shipments are now more accessible and being used more frequently whenever needed.

We will continue monitoring the situation and will immediately update you as new information becomes available.

Best Regards,

Amir Bohadana
Executive Director | Sales
