

Standard Manifolds

Monoblock Design

Elcam Medical produces the widest range of manifolds that meet I.V therapy including highflow systems, angioplasty, anesthesia and hemodynamic pressure monitoring.

Standard Manifolds

Monoblock Design

Elcam's Manifolds are available in 2, 3, 4 and 5 gang models in a variety of handle colors according to your needs. The right port can be female or male with a luer lock nut.

Our Manifolds can be supplied in materials suitable for ETO and Gamma irradiation, and/or lipid based admixtures upon request.

Handle Type		High Profile				
		Low Profile				
		GXL Handle				
		T - Handle				
Right End Connections		Male Luer Lock				
		Male Luer Slip				
		Female Luer				

Our Manifolds can be supplied with or without vented or sealed port covers.

Body Material:

Polycarbonate or Polysulfone.

Raw material available: either clear (for EtO sterilization only) or tinted blue (for gamma).

Quality in every aspect:

Elcam's highly automated processes ensure production of consistently high quality products.

We operate in strict compliance with the international quality standards.

Elcam's Standard Manifolds are 510(k) cleared.

Colors:

Subject to Manifolds configuration.
